FRACTIONS

SMART ROMAN NUMERALS

The diagram illustrates the transformation of a 2D array into a 1D array. On the left, a 2D array of stars is shown, with each row containing a different number of stars. An arrow points to the right, where the same stars are shown arranged in a single row, representing a 1D array.

DISCRETIONARY LIGATURES

The diagram illustrates the transformation of a 2D array into a 1D array. On the left, a 4x4 grid of numbers is shown. An arrow points to the right, where the same numbers are arranged in a single column, representing a 1D array.

Additional Features Include: Ordinals, Superscript, Numerators, Denominators, Case-Sensitive Forms, and Localized Forms

Astra Nova is a revitalized classic Americana type by François Robert. Following his typeface Baudot, Astra Nova was first introduced in 1969 under the name “Astra” in the rub-down type (dry transfer) format. This iconic display type is now available as a 21st Century digital font ready to once again perform its duty inspiring hope and positivity.

Similar to Robert's typeface Baudot, the visual concept of this design is letterforms comprised of smaller units on a grid (like pixels) and also channels his admiration for the best aspects of American culture. This new version was carefully engineered to precisely reproduce the subtle vertical overlapping grid of Robert's original design while also greatly expanding the glyph repertoire to field 993 glyphs.

Astra Nova supports 442 languages including Vietnamese and Greek, plus broad support for Afrikan and Oceanian languages. Handy OpenType features such as ligatures (standard and discretionary), fractions, stylistic alternates, and smart Roman numerals are built in to ease access and help make your typography sparkle. You'll also find a selection of useful symbols and shapes for assembling borders and other elements to apply the same aesthetic to other areas of a layout.

Use Astra Nova extra large to add pizzazz to headlines and titles on posters, logos, book covers, album covers, and as big drop caps in a page layout.
